## The Perfect Kitchen for Cat Lovers

If you ever struggle to keep your cat off your kitchen counters, then you may want to think about getting the totally unique Mocaki Modular Cat Kitchen.

This cat kitchen was created by Italian kitchen designers Francesco Vintrici and Daniele Schinaia. Vintrici and Schinaia created the kitchen to be cat-friendly and to help give cats an appropriate source of entertainment while their owners are working in the kitchen.

The Mocaki Modular Cat Kitchen sports a sleek look and includes built-in appliances for excellent functionality. But when you look closer, you'll see that the kitchen is built on a cat-friendly system full of nooks and crannies that cats are sure to delight in. This cat-friendly system can be installed in any way that you like, and you can even add food dishes and toys to increase your cats' fun.

For now, the Mocaki Modular Cat Kitchen is a concept, but if the idea takes off, then hopefully it will be in production soon.
